

# ALGICIDE

## DESCRIPTION

Pool Pride Algicide is an effective treatment that will help eliminate algae and keep your pool crystal clear all year round. Used during the swimming season Algicide will extend the algicidal properties of Pool Pride chlorine sanitisers.

## USES

It should be noted that algicide is compatible with all pool sanitising products. During the non-swimming and winter months, algicide can be used as an effective pool winteriser. Algicide provides an economic and labour saving method of ensuring pools remain free of algae through these non-use periods and promotes easier start-up for the swimming season.

## DIRECTIONS FOR USE

### For the swimming season:

1. Add Pool Pride Algicide to your pool every six weeks to boost algae inhibiting properties of Pool Pride chlorine sanitisers.
2. Dilute using the rates shown in the table below:

Pool Size (L)	Initial Chlorine Shock Dose - Pool Pride Granules	Algicide Content during the Swimming Season	Algicide Content during the Non-swimming Season
10,000	200g	100 mls	200 mls
30,000	600g	300 mls	600 mls
50,000	1000g	500 mls	1000 mls
80,000	1600g	800 mls	1600 mls
100,000	2000g	1000 mls	2000 mls

### For the non-swimming season (Winterising):

1. Vacuum pool and backwash filter.
2. Add an initial shock dose of Pool Pride Granules at a rate of 200g per 10,000L of pool water. Allow pool to de-chlorinate until free chlorine level is between 1 - 2ppm.
3. Pour Pool Pride Algicide around the edges of the pool and re-circulate pool water to ensure uniform distribution. Continue to add Pool Pride Algicide every six weeks at the rate shown for the non-swimming season. Do not repeat the shock dose treatment - filter the pool once per week. For best results it is recommended you cover your pool during this season.

## PACK SIZES

12x1 Lt ctn

Refer to Material Safety Data Sheet for handling and first aid instructions.
