

LIQUID FLOC

DESCRIPTION

Pool Pride Liquid Floc restores clarity and sparkle to pool water by removing fine particles in suspension. Pool Pride Liquid Floc is formulated for the removal of clay, turbidity and fine particles that filtration will not ordinarily clean.

DIRECTIONS FOR USE

To clean murky or cloudy water:

1. Check the Total Alkalinity of the pool before using Pool Pride Liquid Floc. The ideal level of Total Alkalinity for Liquid Floc is 100ppm. Adjust Total Alkalinity as necessary.
2. Use Pool Pride Liquid Floc at a dilution rate of 100 mls per 9000L of pool water. Premix the Liquid Floc in a bucket of water and pour around the perimeter of the pool.
3. Turn you pool pump onto Filter for 12 hours and backwash the filter at regular intervals or as necessary.
4. Turn your pump off for 24 hours. This will allow the fine particles to settle on the floor. For best results do not swim in the pool during this time to avoid disturbing the sediment.
5. Vacuum the sediment to your drainage system and top up pool water as required. For best results repeat the following day.

NOTE

You should only use Pool Pride Liquid Floc when your pool water remains cloudy or murky after you have completed all the steps in the Pool Pride pool care system.

PACK SIZES

12x1 Lt ctn

Refer to Material Safety Data Sheet for handling and first aid instructions.
