

STABILISED CHLORINE GRANULES

DESCRIPTION

Pool Pride Stabilised Chlorine Granules is a white free flowing corrosive granule/tablet with a chlorine odour. Pool Pride Stabilised Chlorine Granules needs to be stored in a cool dry area and used as soon as possible.

USES

- Pool Chlorination
- Algae Control - inhibits and prevents growth
- Pool Cleaning - removing algae, bacteria, and spores in empty pool.
- Food Industries - bacterial control and disinfecting

DIRECTIONS FOR USE

The amount of chlorine product required to maintain the correct level of 1.0 - 1.5ppm will vary depending on bather load and other conditions. With practical daily experience you will get to know the appropriate level for your pool. Here is a guide for Pool Pride Stabilised Chlorine Granules.

Daily Maintenance:

20g of Pool Pride Stabilised Chlorine Granules per day per 10,000L of pool water.

NOTE

Shock dosing must only be done using Pool Pride Chlorine Granules - do not use Pool Pride Stabilised Chlorine Granules. Before swimming wait for the chlorine level to drop to 1.5ppm. The chlorine level should be tested daily using a test kit.

PACK SIZES

4x2 Kg ctn

Refer to Material Safety Data Sheet for handling and first aid instructions.
