

## STABILISER

### DESCRIPTION

A powdered compound used as a stabiliser or conditioner to act as a sun barrier. Pool Pride Stabiliser creates more efficient use of chlorine and reduces the loss of freely available chlorine through UV light.

### DIRECTIONS FOR USE

Apply Pool Pride Stabiliser at the beginning of the swimming season and at 3 monthly intervals.

Pool Pride Stabiliser is not required if you are chlorinating with Stabilised Chlorine Granules or Tablets.

#### **BEGINNING OF THE SEASON:**

Distribute Pool Pride Stabiliser to pool water at the rate of 250g per 10,000L of water. This will result in a level of approximately 30ppm.

#### **3 MONTHLY REQUIREMENT:**

Distribute Pool Pride Stabiliser to pool water at the rate of 250g per 10,000L of water.

### NOTE

It is extremely important that you do not over-dose with this product at too high a level as it will "lock up" the chlorine making it ineffective. This will cause symptoms similar to having no chlorine in the pool. Always check accurately the level of Pool Pride Stabiliser prior to any additions.

### PACK SIZES

4x2 Kg

Refer to Material Safety Data Sheet for handling and first aid instructions.
